

Engraved map, hand-coloured in outline.

ALLARD'S VERSION

Leo Belgicus. Ampliss. ac Prudentiss D.D. Praetori, Consulibus Totique Senatui Reip...
1665.

Author

GERRITSZ, Hessel

Publication date

1665.

Publisher

Hugo Allard,

Publication place

Amsterdam,

Physical description

Engraved map, hand-coloured in outline.

Dimensions

430 by 555mm. (17 by 21.75 inches).

Notes

Sixth state of the first plate, with Allard's imprint inserted.

In 1608, the famed cartographer Hessel Gerritsz published a new version of the Leo Belgicus with the Netherlands orientated with the west at the top. Again the lion's back follows the coastline,

however, this time he is shown walking on all fours (passant), with his head facing south – towards the Spanish threat.

The genesis of this map is somewhat complicated, as no example of Gerritsz' original survives. The waters are further muddled by the fact that Gerritsz would appear to have engraved two, almost identical, copper plates. Although neither of the first states survive, it is likely that the works were engraved between 1608 and 1612, for two reasons: first, Gerritsz set up on his own in 1608, having been previously employed by Willem Blaeu, second, if one looks at the cartography, the map is unlikely to have been engraved after 1612, as the lakes of northern Holland have yet to be reclaimed.

The present map is an example of the so called Allardt (or Allard) version. To the left is a table of towns and villages, to the upper right is an elaborate title cartouche. Below the lion's feet is a legend that reads:

"The Leo Belgicus as a personification of the Netherlands. My fame of Trojan courage and strength, my glory as another Mars are known world wide. But far more happy would I be than many a king, if the gods would grant me everlasting peace".

By the time the present map was published, it had had three careful owners; Gerritsz himself, Cornelius Janszoon, and Jodicus Hondius. It is most probable that Dankerts acquired the plates from the Hondius family at some point during the 1630s. The plate would later be acquired by Hugo Allard who published it in 1665.

Bibliography

Van der Heijden, 15.5, noting three examples.
