

Engraving with acquatint, with moveable parts, in original frame.

AN EARLY NINETEENTH CENTURY PERPETUAL CALENDAR

Calendrier Perpetuel.

Author
GAUTIE: IR PS

Publication date
1812].

Publisher

Publication place
[?Paris,

Physical description
Engraving with acquatint, with moveable parts, in original frame.

Dimensions
250 by 310mm (9.75 by 12.25 inches).

Notes
In the upper part of the plate is the title on a banderole held aloft by two cherubs; to the centre is sphere which bears the year; below are two further spheres which contain information upon days, star signs, day and nigh times, and sunrise and sunset. Two further tables give list signs of the zodiac and the dates for the beginning of spring, summer, autumn and winter. Below the calendar is a copy of Guido Reni's 'Aurora'.
