FIRST AND ONLY EDITION OF THE FIRST CARTOBIBLIOGRAPHY

Orbis terraqueus in tabulis geographicis et hydrographicis descriptus

Author
PAULLI, Simon

Publication date
1670.

Publisher
in Officina Libraria Editoris,

Publication place
Strassburg,

Physical description
Octavo. Title-page printed in red and black with woodcut vignette, contents leaf printed in red and black; contemporary vellum backed, marbled paper boards, the title in manuscript on the front cover.

Dimensions
175 by 100mm. (7 by 4 inches).

Notes
Paulli’s is the first cartobibliography, and he has touchingly dedicated his work to Blaeu, Jansson

and Visscher. The book includes descriptions of maps of the world, continents, and the countries of Europe by these cartographers, as well as Ptolemy, Ortelius, Goos, van Loon, Sanson, and others; from geographies, pilots and maritime atlases.

From page 113, Paulli lists nearly sixty maps of the Americas, beginning with Ortelius; and one map of the Antarctic, by Jansson.

Bibliography
Sabin 59224

Provenance

Price: £6000

Inventory reference: 15071
