Notes
Norie's chart of the south coast.

John William Norie (1772 – 1843) was a mathematician, hydrographer, chart maker and publisher of nautical books. His most famous work was the 'Epitome of Practical Navigation' (1805), which became the standard work on navigation and went through many editions. Norie began his career

working with William Heather, who ran the Naval Academy and Naval Warehouse in Leadenhall Street from 1795, which sold navigational instruments, charts, and books on navigation. Norie took over the Naval Warehouse after Heather's retirement and founded the company J.W. Norie and Company in 1813. After Norie's death the company became Norie and Wilson, then in 1903 Imray, Laurie, Norie & Wilson.
