Calculated by H. Gore Teacher of the Mathematicks in Manchester. Eman: Bowen Sculp.

Author
GORE, Henry

Publication date
1724

Publisher
Emanuel Bowen

Publication place
London

Physical description
Engraved print in good condition

Dimensions
335 by 210mm. (13.25 by 8.25 inches).

Notes
The main body of the engraving is a table, with timings for London, of how the eclipse will appear as

it crosses the Earth from the Pacific, over California, Mexico, Canada, the Atlantic, Ireland, Cornwall and France before ending with sun set over Mantua.

Two large diagrams show the appearance of the Eclipse at London at the beginning and end; four smaller diagrams show how it would appear at Quebec, Boston, Jamestown and Bermuda.

Bibliography
Unrecorded in ESTC; unrecorded in Armitage, Shadow of the Moon; Worldcat gives Brown University Library, History of Science Collection, Hay Prints, P11313.
