SMITH, C[harles]

Publication date
Oct. 1st, 1817, [and] Aug. 1st, 1816.

Publisher
London, Published by C. Smith Mapseller No.172 Strand,

Publication place

Physical description
Two separately issued engraved charts, with fine original full wash colour.

Dimensions
530 by 680mm (20.75 by 26.75 inches).

Notes
Rare separately issued charts illustrating the great rivers and mountains of the world.

Although early atlases included tables listing the lengths and heights of the world’s great rivers and

mountains, it was not until the early nineteenth century that rivers and mountains were graphically represented and compared. The present examples would appear to be the earliest of the genre, as they predate those listed by J.A. Wolter in his seminal work upon the subject.

Both charts are rare. We were only able to trace two institutional copies of the river chart, one in the British Library and the other at the University of Utrecht; the chart of the mountains is recorded in three examples, one at Harvard; another in the Rumsey Collection; and another in the BL.
