Publication place

[London,

Physical description

Large engraved map on four sheets, dissected and mounted on linen, with original full-wash colour, edged in green silk, housed within original green marbled paper slipcase, label with title and author in manuscript, pasted on, rubbed.

Dimensions

970 by 1240mm (38.25 by 48.75 inches).

Notes

John Andrews together with Andrew Dury were responsible for three of the major eighteenth century county surveys: Hertfordshire 1766, Kent 1769, and Wiltshire 1773. To this must be added the present map of the Isles of Wight – as it was surveyed upon the same scale of two inches to the mile. The map itself bears stylistic similarities to the work of John Rocque, with the hills shown in caterpillar fashion and the fields differentiating between meadow and arable. Most large-scale maps were on a scale of one inch to one mile – the larger scale allowed for the use of far greater detail especially in the road system, which includes even the narrowest of lanes, and in the delineation of towns, villages and parishes. Also shown are hills, heaths, woods, parks, and commons, rivers, water-mills, marshes and ponds, and kitchen gardens. To the sea are numerous sailing ships, with soundings marked. The publisher's imprint bears the name Andrew Dury, and Mary Anne Rocque – the widow of John Rocque – whose pictorial style so influenced John Andrews.

To the lower left is a dedication to Henry Powlett, 6th Duke of Bolton, who was at the time Vice-Admiral of Dorset and Hampshire. Below the dedication is an alphabetical list of 105 subscribers, and to the lower right a plan of Newport on a scale of approx. 400 ft to the inch.

The present map is a superb example of the first edition with the imprint of Mary Anne Rocque, and dated 1769. The second edition bears the date 1775, and text below the title reads: "N.B. This Second Edition has been corrected with several improvements".

Rare we are only able to trace two institutional examples of the first edition: the Bibliotheque National de France; Cambridge University Library.
