

Double-page woodcut map, fine original hand-colour, slight dampstaining to upper portion of map.

## THE ULM PTOLEMY'S MODERN MAP OF SPAIN

**Tabula Moderna Hispanie.**

### Author
PTOLEMAEUS, Claudius [translated by ANGELUS, Jacobus, edited by GERMANUS, Nicolaus]

### Publication date
16 July 1482.

### Publisher
Lienhart Holle,

### Publication place
Ulm,

### Physical description
Double-page woodcut map, fine original hand-colour, slight dampstaining to upper portion of map.

### Dimensions
420 by 565mm. (16.5 by 22.25 inches).

### Notes
The modern map of Spain printed in the Ulm edition of Ptolemy's "Geographia" of 1482. One of the earliest obtainable "modern" maps of Spain. The various regions of Spain are clearly marked, with the Kingdom of Navarre highlighted in green, and Portugal in light yellow wash.

The map was published in the first atlas printed outside Italy and the first atlas illustrated with

woodcut maps.

In 1482 Lienhart Holle in Ulm published a revised edition of Ptolemy's Geographia with the reworking of the Ptolemaic corpus by the cartographer Nicolaus Germanus Donis. The atlas included five additional "modern" maps: Italy, Spain, France, Scandinavia, and the Holy Land. The atlas would be the first book printed by Lienhart Holle, however, it would appear that the venture proved ruinously expensive and his business would go bankrupt shortly after publication. The remaining sheets, the woodblocks and the types passed to Johann Reger in Ulm, who reissued the work in 1486.

As well as the modern maps the atlas bears some other notable first. It was the first time that maps were signed by the artist responsible for the woodcutting; in this case Johannes of Armsheim, who signed the world map, and incorporated a backwards N into the woodcut text on each map. It is also the first to print the accompanying text on the verso of the map to which it refers. Another important feature of the Ulm editions is the introduction of the publisher's colouring upon the maps. Maps from 1482 usually have a rich blue colour in the sea which was replaced with a soft brown colour in 1486.
