

Double-page engraved map.

## CORONELLI'S MAP OF SOUTHEAST ASIA

**Isole dell'Indie, divise in Filippine, Molucche e della Sonda Descritte, e Dedicate Dal P. Coronelli, Cosmografo della Serenissima Repubblica di Venetia, All'Ill.ano Sig. Abbate Daniele Gradenigo, Patritio Venete, Canonico di Padou'a etc.**

### Author

CORONELLI, Vincenzo Maria

### Publication date

1696.

### Publisher

Girolamo Albrizzi,

### Publication place

Venice,

### Physical description

Double-page engraved map.

### Dimensions

455 by 670mm (18 by 26.5 inches).

### Notes

An attractive map of Southeast Asia, including the Malay Peninsula, Cambodia, the Philippines and all of Indonesia and the Spice Islands, with part of the north coast of Australia. Published in Vincenzo Maria Coronelli's 'Isolario', with a vignette globe gore of the Gulf of Bengal and the Malay

Peninsula on the verso, and although not intended to be part of a globe itself, part of a brilliant marketing strategy that reused the engraved plates originally prepared for the globes, in atlas format.

#### The mapmaker

Vincenzo Coronelli (1650-1718) was an Italian cartographer and globe maker. He was apprenticed to a woodcut printer at ten years old, but then entered the Franciscan Order as a novice at thirteen.

In 1701, he was made Father General of the Order, but was removed from office by the Pope three years later after complaints from fellow clerics. Coronelli mainly lived and worked in Venice, but an opportunity arose to make his name when an early commission for two globes for the Duke of Parma brought him to the attention of the Cardinal d'Estrées, who summoned him to Paris to create two huge globes for Louis XIV. They each had a diameter of fifteen feet, and were built with trapdoors so they could be worked on from the inside. He was made royal cartographer to Louis XIV in 1681 as a result, and worked in Paris for two years. He collaborated with Jean Baptiste Nolin, who went on to become the French publisher for all of Coronelli's work.

On his return to Venice, Coronelli was made cosmographer to the Republic, and granted a stipend of 400 florins a year. He printed globe gores in the 'Libri dei Globii' as well as producing pocket globes, and his large globe over a metre in diameter was owned by royalty across Europe. He issued the 'Atlante Veneto' in 1691, which was intended to be an extension of Blaeu's atlas in three parts, covering hydrography and ancient and modern geography. One of the volumes was an isolario.

Coronelli was known as a careful scholar, and his work across Europe gave him access to the latest information. For example, he produced the first widely published European map of settlements in New Mexico, 'America Settentrionale' (1688), after being given the information by a former governor of New Mexico, Diego de Peñalosa.

Coronelli also founded the world's oldest surviving geographical society, the Accademia degli Argonauti, who produced a printed version of the Paris globes. They were named for Jason and the Argonauts, the adventurers who set out to find the golden fleece; their symbol was the globe surmounted by a ship in full sail. A list published in the 'Epitome cosmografica' in 1693 reveals that the society counted princes, ambassadors and cardinals amongst its members. They were to receive a minimum of six copper engravings a month, creating a guaranteed market for his productions. Before his death, he had managed to produce six volumes of what he hoped would be a comprehensive encyclopedia, the 'Biblioteca universale sacro-profana'.
