

Engraved chart, soundings, latitude and longitude, signs of the sea, and six coastal profiles.

CUBA - SOUTHEAST COAST

Carta Esferica qe comrende la Costa... de la Isla de Cuba...

Author

RIO, Jose Del

Publication date

1821

Publisher

Publication place

Madrid,

Physical description

Engraved chart, soundings, latitude and longitude, signs of the sea, and six coastal profiles.

Dimensions

600 by 910mm (23.5 by 35.75 inches).

Notes

Rare Spanish Admiralty chart of part of the south-east coast of Cuba.

The charts produced by the 'Direccion de Hydrografica' were detailed surveys not unlike the charts of the British Hydrographic Office, however official Spanish charts of this sort appear on the market much less frequently than their French and English counterparts, and even fewer have appeared to survive than contemporary American publications.
