Joannes van Keulen boeckverkooper en graed-boogh maecker aende meuwe brug in de gekroonde Lootsman,

Publication place

Amsterdam,

Physical description

Engraved chart with original hand colour.

Dimensions

537 by 630mm. (21.25 by 24.75 inches).

Notes

A chart of the Atlantic, oriented to the west, from van Keulen's 'Zee-Atlas'.

Johannes van Keulen (1654-1715) was a Dutch maritime publisher. He established a bookselling and instrument making business in Amsterdam in 1678, and by 1680 he had obtained a privilege from Holland and West Friesland to print pilot guides and sea atlases. His first major production was the atlas 'Nieuwe Lichtende Zee-Fakkel', illustrated by Jan Luyken and with maps by Claes Jansz Vooght. Five volumes were published between 1681 and 1684. Van Keulen also produced a 'Zee-Atlas'. Van Keulen chose an advantageous time to enter his profession, as many of the great early seventeenth century mapmakers were closing down or at the end of their careers, and therefore putting their stock and copperplates on the market.
