Physical description

Folio (533 by 380mm; 21 by 15 inches), letterpress title-page and Index leaf listing 47 engraved maps with a contemporary manuscript note next to 44 "A New Chart of the Banda Sea" stating that it is "not yet Published". 45 numbered engraved maps on 46 map sheets, including 42 double-page and or folding and four full-page, extra-illustrated with a manuscript map in pen and ink and colour wash on the front free endpaper. Contemporary mottled calf, gilt, loose linen cover.

Dimensions

Notes

A superb example of Laurie and Whittle's exceptionally rare 'Oriental Pilot' in unusually fine condition and annotated by its original owner, James McFarland, during his voyages in the Atlantic and the South African coast between 1799-1803.

Published as a practical guide to navigators aboard ships of the Royal Navy and East Indiamen, and often taken to sea, all variants of Laurie and Whittle's 'Oriental Pilot' are scarce and often found in a very used condition. The present example was originally owned by James Hepburn MacFarland RN (1769-1852), who has annotated a number of the charts in the atlas.

The magnificent and often very large charts in Laurie and Whittle's 'Oriental Pilot' cover the entire sea journey from Portsmouth on the south coast of England to the East Indies and Australia. The work was published under several titles, each with a different complement of charts. Variants include: 'The Country Trade East-India Pilot, for the Navigation of the East-Indies and Oriental Seas, within the limits of the East-India Company', 'The Complete East-India Pilot, or Oriental Navigator', 'The East-India Pilot, or Oriental Navigator', and 'The Oriental Pilot; Or, East-India Directory' focusing on the most important charts used for the journey, as here.

This example of the atlas includes the formidable four-sheet chart of the Atlantic Ocean, the very large two-sheet charts of the 'British Channel', the south coast of England, and the Indian and Pacific Oceans, as well as individual and detailed charts of the waters surrounding South Africa, and particularly the Cape of Good Hope, India, Arabia, the islands of the East Indies, and eastern Asia. Of particular note is the rare and important map "A New Chart of the China Sea,...", which shows the future sites of Hong Kong and Singapore.

MacFarland's detailed notes can be found on the chart of False Bay at the Cape of Good Hope in and around the bay he identifies as "Hook Bay", now known as Fish Hook. He records the number of guns defending the two batteries there, and where to find fresh water. On the verso of the chart he identifies the main landmarks in False Bay by their relation to Whittle Rock, which does not appear on the engraved chart, and may be the first reference to the outcrop.

On the chart of the Southern Ocean, MacFarland records being off the coast of Paraguay at the mouth of the River Plate, or Rio de la Plata in May of 1801. A detailed manuscript copy of Malaspina's chart of that coastline combining his surveys of 1789 and 1794, covers the front free endpaper of the atlas. MacFarland's long manuscript note on the verso of the map of Madagascar shows the depth of his own knowledge of the region and that of his contemporaries by adding more recent and important information than is recorded on Laurie and Whittle's chart: "Observe that the Chart of Madagascar gives only 2° of Latitude between Foul Point and Fort Dauphin. When the Directory gives 3° 13, The French (by Mr. D'Après's and Mr. Le Gentil's Observations) 3° '7, and Hamilton Moore's Book of Navigation 2° 5'4."

James MacFarland entered the Royal Navy in 1781. He rose through the ranks and served on Admiral the Earl Howe's staff on the HMS Queen Charlotte. He was promoted to Acting Lieutenant

in 1794 as a reward for his conduct on Howe's vessel in action during The Glorious First of June, and was presented to King George III. He was stationed at the Cape of Good Hope from about 1800. After the colony was returned to the Batavian Republic at the Treaty of Amiens in March 1802, MacFarland returned home aboard the "Sloop Penguin", formerly the Dutch national ship Komet. He has annotated both charts of the Atlantic Ocean with details of his voyage home from the Cape, between February and April of 1803.

The maps are:

[-] [MALASPINA, Allessandro]. Carta Esferica Del Rio de la Plata Levantada Por las Corbetas dela Marina Rl. Ano de 1789 y 94. Full-page, pen and black ink and colour wash, front free endpaper

1. A New Chart of the British Channel, from the Mouth of the Thames to Ushant, and the Scilly Islands; From an Actual Survey revised, corrected, and improved. By John Stephenson, a Master in the Royal Navy. London: Laurie & Whittle, 12th May, 1794. 2 sheets joined, double-page and folding
