Publication date
1925-33.

Publisher
Martinus Nijhoff,

Publication place
The Hague,

Physical description
Folio, five volumes of text in one and 5 volumes of maps, elephant 2°, 126 collotype maps unbound as issued in original portfolios brown buckram and original cloth-backed portfolios.

Dimensions

Notes
Wieder’s magisterial collection of reproductions of important maps in the history of Dutch cartography during the Age of Discovery: an essential reference work for those interested in the

period. It includes maps and plans from the atlas of the collector Laurens van der Hem and the 1665 Vingboons manuscript atlas.

The author, Dr Friedrich Caspar Wieder (1874-1943) was an eminent cartographical scholar, and his work remains a rare and respected milestone in the field.

Bibliography

Kees Zandvliet, “Mapping the Dutch World Overseas in the Seventeenth Century” in David Woodward (ed.), The History of Cartography, Volume 3: Cartography in the European Renaissance (Chicago: University of Chicago Press, 2007).
